

Accounting, Decision Making, and Financial Communication Training

Description

Intorduction

This course will provide a comprehensive illustration of how accounting information is collected, recorded, how it is analysed and presented both internally and externally, to support effective management, control, and decision making. This is important because key personnel in an organization use accounting information which is often said to be the 'language of business'; hence it is essential to understand and to be able to use this language.

This course will also introduce delegates to the systems and structures of financial and management accounting and their value in ensuring the success of the business. Delegates will be exposed to, and enjoy an 'MBA Level' experience in terms of content, instruction, discussion, and team exercises.

This course will feature:

- The finance function, and financial and management accounting systems
- The income statement, balance sheet, and cash flow statement
- How to accurately determine product or service costs
- Accounting techniques for effective decision making
- Using budgets to control the business

Objectives

- Members of the operational management team
- Managers who have responsibility for divisional performance
- Managers who have responsibility for support functions
- Consultants who provide advice on systems and operations
- Senior staff members of any department
