

Debtor and Working Capital Management Training

Description

Course Objectives

On completion of this course you should be able to:

- Distinguish between the internal working capital management function and an external interpretation of a firm's working capital position revealed by its published accounts, Calculate the working capital operating cycle and financing cycle from published accounting data and analyse the inter-relationships between the two,
- Define the dynamics of a company's credit-related funds system,
- Explain how the terms of sale, which comprise the credit period, cash discount and discount period, affect the demand for a firm's goods and services,
- Understand the impact of alternative credit policies on the revenues and costs, which are associated with a capital budgeting decision,
- Appreciate the disparities between the theory and practice of working capital management, given our normative wealth maximisation assumption.
