

Finance for Non-Finance Professionals Training

Description

Introduction

Business professionals and managers in any organization rely upon financial information to enable them to effectively undertake their roles. Financial information can provide a clear picture of events that have occurred, and a sound basis for forecasting future events. It can also show whether activities are cost-effective, whether targets have been met, and can be used to measure comparative performance and profitability.

It is vitally important that managers are able to understand, interpret, and utilize financial information and reports, and can acquire the knowledge and skills to apply financial techniques to financial data, to inform logical and worthwhile decision-making.

The key elements of the course will be:

- The role of the Finance Function, in transaction recording and reporting, management control and decision-making, raising finance, internal control and risk management.
- The basic principles of financial accounting and reporting, the three main financial statements, and how they are prepared and presented.
- Review and analysis of published financial reports, and how they are perceived by various stakeholder groups.
- Management accounting procedures and techniques used in organizations to control operations and inform profitable decision-making.
- The importance of Treasury management for large multi-national organizations, and examples of how these can be used to control and manage risk.

Objectives

- Explain the purpose of the three key financial statements 'Income Statement, Statement of Financial Position, and Cash Flow Statement'.
- Evaluate the performance and position of an organization by analyzing their Annual Financial Report.

- Apply the management accounting procedures & techniques of 'product costing, cost-volume-profit analysis, budgeting, & variance analysis.
- Apply a range of investment appraisal techniques to determine whether proposed investments are likely to be worthwhile.
- Demonstrate a range of methods, tools and techniques available to manage financial risks in multinational organizations.

Contents
