

Inspection, Assessment and Repair Of Concrete Structure Training

# **Description**

# **Course Description**

This course is intended for civil, construction engineers and inspectors who are interested in the area of inspection, assessment and repair of concrete structures. This course enables delegates already familiar with what concrete is, to develop skills in effective specification, production and end users of concrete. The course also covers basics as well as advanced concepts up-to-date technology.

Concrete is used throughout the world for a wide range of applications. In order to improve the properties of concrete, recent advances in material science introduce new materials or admixtures to be added to or replace conventional concrete materials. Such materials could be used in new concrete construction and/or in repairing new or existing structures. These materials could cause more harm than benefit or at least be ineffective if not properly used.

This five-day course will introduce newly developed concrete materials as well as the repair materials utilized in most repair works in concrete structures either for those needed during construction or for rehabilitation of existing structures.

The course will also cover test methods and technical specifications for such materials as well as troubleshooting for their most common problems.

At the end of this course, participants will know the necessary information about the different advanced concrete materials, what tests should be performed and how to interpret their results, what to look for in specifications and troubleshooting of material related problems.

#### **Course Objective**

The participants will be provided with detailed course material and will be familiarized with various features on concrete construction.

 Provide participants with required information about the newly developed reinforced concrete materials.

- Help them understand the different test methods for various materials and interpret their test results.
- Assist participants to effectively consult the technical specifications of these materials.
- Provide them with troubleshooting methods for material-related problems.

#### **Course Outline**

#### Introduction and Overview

- Conventional Concrete Materials Limitations and Problems
- High Strength Concrete and High Performance Concrete
- Special Constituent materials and Admixtures

#### **Construction Practices for Concrete in the Gulf**

- Specifics of Gulf Environment
- Definition of hot weather for concreting processes
- Precautions for different concreting operations in the hot weather of Gulf region

# Non-Traditional Types of Reinforcement Used in Concrete Structures earn.co.

- Galvanized and epoxy coated bars
- Prestressing steel
- Fiber Reinforced Plastic (FRP) reinforcement for concrete

# **High Strength Concrete: General**

- Importance and Economy
- Durability Improvement
- Structural Improvement
- Concerns

## **High Strength Concrete: Materials**

- Slag (GGBS)
- Fly Ash
- Silica

#### **High Strength Concrete: Production**

- Batching and Mixing High Strength Concrete
- Placing and Compacting High Strength Concrete
- Finishing and Curing High Strength Concrete

#### **High Performance Concrete**

- Definition
- Importance and Economy
- Performance Improvement

Concerns

#### Standard Test Methods for Non-Conventional Concretes and Reinforcement

- Standard test methods for fresh and Hardened Special concretes
- Standard specifications for epoxy coated bars
- Standard specifications for steel wires and strands for pre-stressed concrete
- Standard test methods for properties of FRP rods

## **Technical Specifications for Concrete and Reinforcement**

- Specification definition and specified qualifications
- Specification types, features and format
- Sample concrete and reinforcement specifications

#### **Latex Modified Concrete: Introduction & Materials**

- Background
- ww.acculearn.co.uk Standard Specifications and Guides
- Materials

#### **Latex Modified Concrete: Production**

- Mix Proportioning
- Mixing and Placing
- Finishing and Curing

## Latex Modified Concrete: Properties and Applications

- Properties of Fresh LMC
- Properties of Hardened LMC
- Durability of LMC
- Applications and Recent Development

#### Repair Materials for Concrete Structures

- Required properties in repair materials
- Types of repair materials
- · Repair methods and techniques
- · Sample technical specifications for repair works

#### **Advanced Concrete Materials: Problems and Solutions**

- Dosage and Over Dosage
- Workability
- Setting and Finishing
- Long Term Performance
- FRP versus steel reinforcement
