

Mastering Finance for Non-Financial Oil and Gas Personnel Training

Description

Introduction

This course is aimed at professionals from all areas of business who require a better understanding of how finance works. The course offers insights into the main factors that are essential to the successful financial management of Oil and Gas corporations. In an uncertain economic environment managers need to be aware of the power and importance of key stakeholders – shareholders, bankers, customers and suppliers. Managers need to efficiently allocate resources, whilst recognizing environmental and ethical concerns, controlling risks, and effectively communicating strategy and performance.

This course provides professionals from non-finance backgrounds with a fundamental grasp of the important principles of finance. This gives them the confidence to work alongside financial experts, make informed choices and fully participate in the management process.

This course will feature:

- The relevance & importance of accounting & finance to the success of your business.
- The unique features of Oil & Gas accounting that impact on reporting & decision making.
- Budgeting and costing techniques & how to apply them.
- The techniques available to determine the most profitable & worthwhile investments for your business.
- Effective ways to control the financial risks of your business.

Objectives

- Understand and evaluate corporate financial reports.
- Determine sources of capital, and capital structure.
- Identify and appraise wealth-generating investments.
- Recognise, quantify, and control financial risk.
- Understand & apply accounting & financial techniques in an Oil & Gas corporation.
