

Professional Skills for Finance and Accounting Training

Description

Introduction:

Finance is a core process/function in business that requires executive attention. Accounting is the language of business; understanding and applying this language to your business in general remains the single most valuable competence of management. Prepare yourself by enhancing your personal competence in identifying best practices in finance and in accounting. This programme you will:

- Focus on real companies and their finance function and accounting processes to show participants which elements have achieved best practices status
- Will remove much of the mystique associated with the management of finance and accounting
- Focuses on challenging you to become the strategic financial leaders of the organization
- Prepare yourself for future responsibilities by examining best practices in these important functions/processes

Objectives:

Participants attending the programme will:

- Identify best practices for the roles of CFO, controller, treasurer, and accountants in the content of, and relationships between, financial statements (income statement, balance sheet, and statement of cash flows)
- Discuss best practices in the use of financial statements to evaluate the financial / strategic performance of an organization
- Understand best practices in discounted cash flow (DCF) techniques and their application to financial decision-making
- Identify best practices in corporate performance management using key success factors, weak financial signals, and strong financial signals in various industry sectors
- Understand best practices in how EVA® (Economic Value Added), SVA (Shareholder Value Added), and RI (Residual Income) can be used to value competing strategies
- Define best practices in the value creation/destruction process in mergers and acquisitions from

the market perspective and signals to management from the market

- Clarify best practices in the roles of directors, auditors, and others in their respective roles in corporate governance
- Identify best practices in the various sources of financial and business data that provide insights into business and financial strategies
- Identify best practices in the details of financial control, risk management, and financial reporting from the perspectives of the internationally recognized professional associations such as IFAC, IASB, SEC, OECD, and others
- Enhance personal networks of similarly minded high potential managers
